(54) Title: WIDE BANDWIDTH NET IMAGE PLAYING MOBILEPHONE AND IMAGE PLAYING METHOD

(54) 发明名称: 宽带网影像播放手机以及影像播放方法

(57) Abstract: The invention disclose a mobilephone of wide bandwidth net image playing, including: image player, used to separate the video signal and accompanist signal from the received signal; image projector, including: data format convert, used to convert data format of the video signal which is separated from the image player, data speed convert, used to convert data transmit speed of the video signal which is separated from the image player, photoelectrical convert, which convert the video signal which converted by data format and data transmit speed into light signal, and projector device, used to project the said light signal to the projection. In according to the invention, by projecting the image signal to the projection, we will see the image signal more distinctly and noticeable.
